Education

Schulich School of Engineering, University of Calgary

- Master of Engineering in Software
- Bachelor of Science in Electrical Engineering

Skills

- **Languages:** JavaScript/TypeScript, Python, SQL, Java, C/C++, HTML, CSS, Bash
- **Frameworks:** React, Next.js, React Native, Django, Node.js, Express.js
- **Testing:** Playwright, Cypress, Qase, BrowserStack, Postman, TestFlight
- **Data Management:** PostgreSQL, MySQL, MongoDB, Supabase
- **Tools:** Git, Docker, Jira, Figma

Experience

Software Quality Assurance Analyst

Feb 2024 - Present

Showpass, Calgary, AB

- Developed automated test suites with Playwright, reducing manual regression effort.
- Migrated the existing Cypress suite to Playwright, eliminating the need to maintain two frameworks.
- Designed and executed API test cases to validate data integrity and ensure endpoint accuracy.
- Designed and executed rollout test plans for new features to reduce post-deployment issues.
- Researched and implemented new testing tools and strategies to enhance efficiency and coverage.
- Fixed codebase issues using the existing tech stack to support application stability.
- Managed client support tickets, identified issues, and escalated as needed.

Graduate Research Assistant

Jun 2023 - Apr 2024

Biometric Technology Lab, Calgary, AB

- Improved breathing pattern detection accuracy by 10% using machine learning.
- Developed software to track human movement in videos for automated data collection.
- Developed tools to clean sensor data, improving data processing speed and accuracy for research projects.
- Wrote technical documentation and presented findings to project stakeholders.

Software Quality Assurance Intern

Jul 2021 - Apr 2023

Computer Modelling Group Ltd., Calgary, AB

- Integrated version control systems to improve code management.
- Created Python scripts to automate data collection and reporting.
- Set up scheduled testing to reduce manual work.
- Built tests to identify memory issues and performance problems.
- Managed testing for product releases.

Projects

K-pop Fan Community Site (In Progress) | React, Next.js, Supabase, Tailwind, Shadcn

- Developing a fan website to browse K-pop group stats, socials, and concerts to boost engagement.
- Features include user artist favourites, song suggestions, and next concert alerts, designed to enhance personalized user experience.

QA Tool Box (On Deck) | TBD

- Conceptualizing an all-in-one QA tool to consolidate resources, reduce redundant tab switching, and improve delivery consistency.
- Planned features include charts, diagram makers, and copy/paste tools to streamline workflow.

[Church Website](#) | React, Next.js, Supabase, Django, Chakra UI

- Developed a landing page for a local church, cutting content update and media upload time.
- Designed responsive event pages and contact forms to improve usability across devices.
- Created media management tools, enabling faster and consistent content publishing.
